

Timbr.ai named a Gartner Cool Vendor

Timbr.ai, a leader in semantic graph data management solutions, announced that it has been named a Cool Vendor in the recent Gartner® report on Cool Vendors™ in Data Management¹.

“We consider our inclusion in the report a validation of our approach to simplify data analytics using semantic graph technology and help data-driven organizations to build their self-service data consumption layer. Timbr renders conventional data integration methods obsolete, as they have become too complex, rigid and slow” said Amit Weitzner, CEO of timbr.ai.

He added that “timbr.ai delivers the most innovative technology in the knowledge graph - data management landscape, enabling an integrated semantic, harmonized view of all the data in cloud and on-premises databases. We continue to innovate while we execute on our product roadmap to expand our solution’s capabilities and deliver a truly revolutionary product that will change the way organizations transform data into knowledge”.

About Timbr.ai

Timbr.ai (WP-Semantix Ltd) is the developer of the Timbr semantic graph data management platform. Organizations use Timbr to semantically model data powered with reasoning capabilities, to simplify data consumption and empower users with the fastest, most agile delivery of advanced analytics across multiple and varied data sources, without need of special skills or even knowing where or how the data is stored. Timbr brings the power and features of knowledge graphs to the SQL ecosystem, over any cloud and on-premises database, enabling for the first time integrated, ubiquitous semantic reasoning and graph features. Timbr’s modules and technology are licensed as a comprehensive data management platform and are also available on the basis of OEM licenses.

Timbr, “SQL Knowledge Graph”, “SQL Ontologies”, “Semantic SQL” and associated marks and trademarks are registered trademarks of WP Semantix Ltd.
